| Apparent Temperature Definition                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The perceived temperature accounting for effects of heat index and wind chill. For temperatures over 65 F, the max apparent temperature for 6 hr period is shown. For temperatures less than 65 F, the min apparent temperature for 6 hr period is shown. |

| Thunderstorm Severity Definitions                                                                                                                                                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Thunderstorms (Green)</b> - If thunderstorms develop, they are unlikely to become severe.                                                                                                       |
| <b>Strong to Severe Thunderstorms Possible (Yellow)</b> - If thunderstorms develop, they pose an increased threat of producing wind gusts in excess of 40 mph (35 knots), hail, and potentially tornadoes. |
| <b>Severe Thunderstorms Likely (Red)</b> - If thunderstorms develop, they pose a significant threat of producing wind gusts in excess of 58 mph (50 knots), large hail, and tornadoes.                     |
